Grounds/Floral Policy

The following Floral/Grounds Policy has been established to preserve the dignity and natural appearance of this historic cemetery for all visitors. It also reflects the need for the cemetery's grounds crew to properly, safely, and efficiently mow, trim, and otherwise maintain areas immediately surrounding each gravesite.

Given limited maintenance funding and staffing, your cooperation and assistance with caring for the grounds is greatly appreciated.

Seasonally appropriate potted floral arrangements/wreaths may be placed in urns that are held above ground in conventional urn stands next to gravesites. Floral arrangements/wreaths will be removed and disposed of either when they become faded, moldy, unsightly, or within a week following the given season's conventional end.

Small American flags on veterans' graves are permitted between May 18 (Armed Forces Day) to 10 days after July 4 (Independence Day), and 10 days before to 10 days after Nov. 11 (Veterans Day).

The following are not permitted on or near gravesites: permanent plantings, statues not incorporated into a monument, vigil/solar lighting, breakable objects, figurines, bird feeders, pinwheels, balloons, toys, rocks, pictures, wind chimes, windsocks, banners, shepherd's hooks, flags other than flags of country, food/perishable items, stuffed animals, and similar commemorative items.

Storage of water pitchers is discouraged, but may be placed out of public view directly behind a monument if they are regularly used to water fresh flowers.

All bench and non-conventional monument/cenotaph/gravesite designs must be submitted to the Cemetery Association for approval prior to installation or development. They will be evaluated according to how they may impact the space, dignity, natural appearance, and historic nature of the cemetery.

Parties interested in washing/cleaning monuments should first contact the Cemetery Association for information regarding cleansing procedures that will not damage the monument.
